

Specification Amendments

Page 9 – Please amend the paragraph starting on line 3 and extending through line 8 in the manner set forth below:

Wind catcher elements 123 are mounted to the pole 120 by means of a rectangular frame 125, preferably formed of one inch square aluminum tubing. Each frame has upper and lower horizontal members 127 and 129, respectively, and inner and outer side members 132 and 134, respectively, connected together in a rigid rectangular frame by bolting or otherwise. Upper and lower edges of the wind catcher elements [124]123 are attached, by bolting, to upper and lower horizontal members 127 and 129.
